Professional Summary

DevOps Engineer with 3+ years of Azure experience, including a **40% compute cost reduction** from a large-scale Windows-to-Linux App Service migration. Skilled in **Terraform, ARM, and Bicep, AKS**, secure cloud networking, and integrating **Azure OpenAI** into DevOps workflows.

Experience

Deloitte

June 2023 – Aug 2026

DevOps Engineer

Hyderabad, India

- Architected and executed the migration of Azure App Service plans from Windows to Linux, **cutting infrastructure compute costs by 40%** while maintaining 99.9% uptime and zero service disruption.
- Orchestrated **80+ CI/CD pipelines** (YAML & Classic) on Azure DevOps with modular job templates and parallelized deployment stages, **cutting infrastructure provisioning time by 15%**.
- Automated end-to-end provisioning of **Azure OpenAI and Document Intelligence** services with App Gateways, WAF, Private Endpoints, and **RBAC**; operated Azure OpenAI in production with capacity and quota governance.
- Built an event-driven AI documentation tool using **Azure Functions and OpenAI** that syncs the Azure DevOps Wiki in real time via Pull Request triggers, **cutting wiki update time by 30%**.
- Automated **Databricks** deployments with **Terraform and Terragrunt**, covering networking, MSI integrations, Unity Catalog permission groups, and Databricks Asset Bundles (DABs).
- Standardized infrastructure as code (**Terraform, ARM, Bicep**) for Service Bus, Storage Accounts, Cosmos DB, SQL Server, App Services, Application Gateways, Traffic Managers, Private DNS Zones, and Private Endpoints, ensuring consistency across **50+ environments** from Dev to Production/BCP.
- Administered **AKS** clusters using Dockerfiles, Helm charts, and **Kustomize** (Base/Overlay) templates for pipeline-hosted agents; built **Grafana and Prometheus** dashboards to track cluster health, pod resource utilization, and application performance.
- Monitored production against SLIs/SLOs and used **App Insights and KQL** diagnostics to **reduce MTTR by 45%** and **SLO breaches by 60%**.
- Embedded “shift-left” security with **SonarQube, Snyk, Mend, and Contrast Security** as automated quality gates and dependency scans, **cutting manual testing by 55%** and shortening SDLC cycle time; automated secret rotations and compliance audits with **PowerShell**.
- Served as primary deployment contact for production releases and hotfixes, including off-hours deployments to minimize user impact, and supported **multi-region BCP testing** to validate disaster recovery across global regions.

Deloitte

Jan 2023 – May 2023

Software Developer Intern

Hyderabad, India

- Engineered the “Audit People Manager” application using **Node.js and C# .NET**, creating a centralized platform to track technical certifications and achievements for 500+ employees.
- Developed SQL backend solutions and established automated release gates in Azure DevOps to streamline the transition from development to testing environments.

Technical Skills

Cloud & IaC: Microsoft Azure, AWS, Terraform, Terragrunt, ARM Templates, Bicep, Linux

DevOps & Tools: Azure DevOps (YAML & Classic), GitHub Actions, ArgoCD, Git, Docker, AKS, Helm, Kustomize, Ansible, Prometheus, Grafana, Azure Monitor (App Insights, Log Analytics)

Networking & Security: Application Gateways, Traffic Managers, VNET, Private DNS, WAF, RBAC, SSL Management, SonarQube, Snyk

Languages & Data: YAML, PowerShell, Azure CLI, Python, SQL, KQL

Certifications

- **AZ-400: Microsoft Certified: DevOps Engineer Expert** [Issued 2025]
- **AZ-104: Microsoft Certified: Azure Administrator Associate** [Issued 2024]
- **AI-900: Azure AI Fundamentals (2025) | AZ-900: Azure Fundamentals (2023) | SAFe 6.0 (2023)**

Education

Sri Sivasubramaniya Nadar College of Engineering

2019 – 2023

Bachelor of Engineering in Electronics and Communications Engineering (CGPA: 8.68/10)

Chennai, India
